

## Worker 6

### Key Improvements

- XML2: update CatDV, sequences, cleaner markers, and thumbnails
- filter Worker task lists
- import and export actions
- 64 bit
- OSX Yosemite support
- transcode using ffmpeg as well as Quicktime (plus 3rd party transcoders)
- timed / scheduled actions
- additional export options
- action name shown on every page
- import CatDV .cdv databases
- extract and expand metadata based on file and folder path
- periodically update the status (on / off line of assets)

CatDV Worker 6 adds a wealth of new functions making workflow automations and integrations even more flexible, powerful and easy to deploy.

### Easy things are easy, hard things are possible

Worker 6 automates media workflows without needing costly and time consuming development effort. At the same time it provides many tools for developers and integrators to extend Worker's capabilities.

### Technical Features

Worker 6 includes a number of significant technical advances that open a wide range of new, sophisticated workflows; for power users, integrators and via CatDV Professional Services.

These include:

- 64 bit and Yosemite support
- ffmpeg support for transcodes and proxy creation
- Other systems can easily update CatDV with CatDV XML2 and .cdv import
- Usability improvements: filtering task lists, periodically update status etc
- Actions can be imported and exported, making deployments easier
- Metadata can be harvested and expanded from file and folder names
- New timed actions can be scheduled based on the time and day

### Powerful Workflows

CatDV Worker 6 opens a wide range of new automation possibilities. CatDV Professional Services have deployed several Worker 6 workflows based on its new capabilities, for example:

- Storage updates CatDV when files move or are deleted
- Metadata can be replicated between separate CatDV servers
- Telestream Vantage integration
- Media Check In, and Check Out
- Linked Metadata Fields: One field / button, sets multiple other CatDV fields
- Powerful metadata extraction and expansion from file and path information
- Custom Validation Rules
- Automated, daily CatDV backups

CatDV Professional Services also offer a range of cost effective, fixed price automations, integrations and workflows. Contact [proservices@squarebox.com](mailto:proservices@squarebox.com) for more information.
