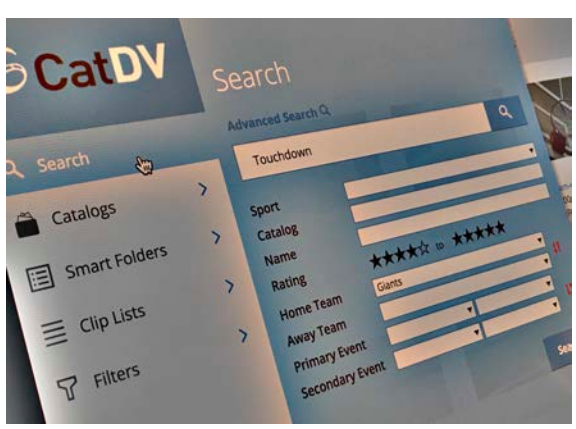
- Touch friendly for mobile devices

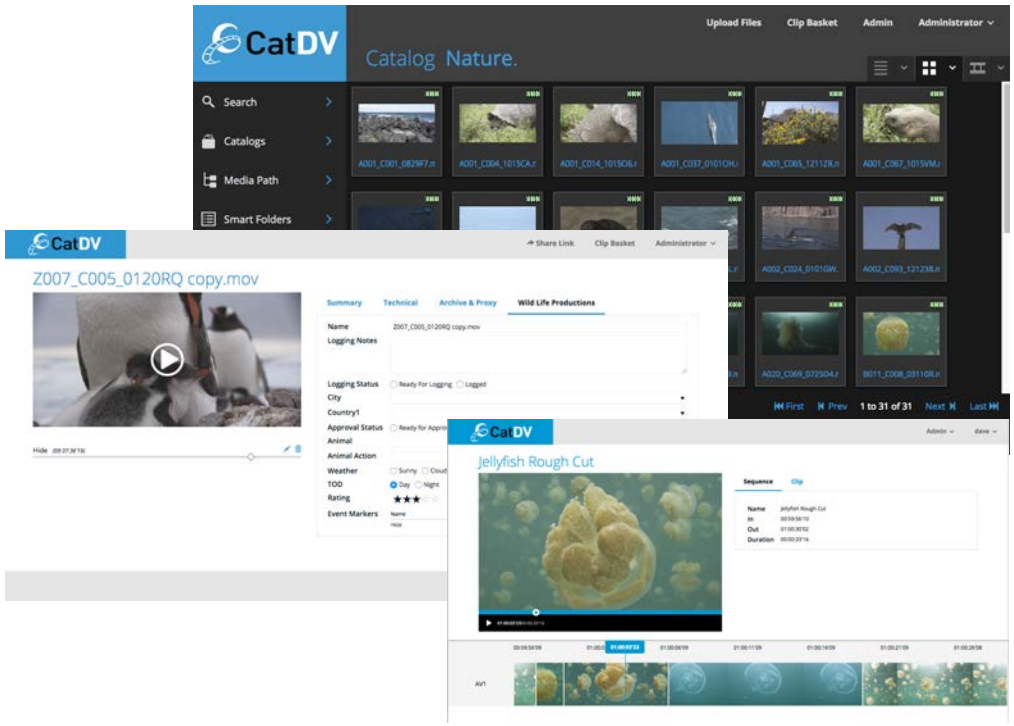
CatDV Web

CatDV Web provides an easy to use, accessible way to interact with CatDV assets. With no need to install special software on the desktop, its easy to deploy to a large number of users, across an organization.



While CatDV's installed clients deliver sophisticated and powerful media management, particularly for content creators, we recognize that different stakeholders have different needs.

CatDV Web extends CatDV's capabilities with a simple and intuitive interface, helping organizations to find and reuse their media assets across the extended enterprise.



CatDV Web boasts an impressive array of features: ingest and search, log and preview, rough cut editing, and review and approval. When combined with CatDV Server 7, web based administration allows users to manage their CatDV system via the web browser, making CatDV suited for mixed or entirely cloud-based deployments.
